

Data Observatory

*Value propositions to become a
Strategic Partner of the Data
Observatory.*

Table of Contents

1. General Background Information	3
2. Technical Background.	4
3. Future Plans and Strategy	5
4. Contributions to the Foundation	6
5. Conditions for Participating	7
6. Additional Information (Optional)	8

1. General Background Information

A written description and supporting documents that can demonstrate the interest and/or experience of the proponent in a working environment that uses large-volume data, requiring real-time analysis, that are being observed in a veracious manner among other complex phenomena in physics. Specifically, certification of the areas of infrastructure that are required for working with this type of data, carrying out the analysis of this type of data, delivering content related to this type of data, professional talent dedicated to working with this type of data; all of the above in relation to data with the specifications that were mentioned initially (Big Data according to Gartner's definition from 2012, and latest derived concepts). Experience and/or interest in areas that complement the former area will also be considered, such as research development, developments that are related to big data, including legal and/or social challenges in the realm of data.

Suggested maximum length: 1 to 3 pages long (4500 – 13500 characters).

2. Technical Background.

Specification of the proponent's technical capacity and talent in matters of the required infrastructure for working with this type of data, carrying out the analysis of this type of data, delivering content related to this type of data, professional talent dedicated to working with this type of data, all of the above in relation to data with the specifications that were mentioned initially, and/or complementary knowledge related to legal and social challenges that are related to data.

Suggested maximum length: 3 to 5 pages long (13500 - 22500 characters).

3. Future Plans and Strategy

A written description that can demonstrate the interest of the proponent including plans for the future in Chile, in relation to the mission of the Foundation.

Suggested maximum length: 1 to 2 pages long (4500 – 9000 characters).

4. Contributions to the Foundation

Specification of the Monetary Contribution and Contribution of Capabilities, including a timetable for completing the specified contributions, and an investment profile according to the table shown in Section 5.

Suggested maximum length: 5 pages long (22500 characters).

5. Conditions for Participating

A definition of the timetable and conditions by which the proponent is eligible for being constituted as a Contributor of Data Observatory.

Suggested maximum length: 1 to 2 pages long (4500 – 9000 characters).

6. Additional Information (Optional)

Other information not explicitly requested in this section, in observance of a **suggested maximum length of 5 pages (22500 characters)**.
